

JESSE DRUM

Business Analytics | Data Analytics

610-609-1468 | Jessedrum00@gmail.com | Havertown, PA | [LinkedIn](#)

TECHNICAL SKILLS

Analytics & BI: Python (Pandas, Matplotlib, Seaborn, Jupyter), Power BI, Sigma, Basic R

Data & Databases: SQL (Basic), Excel (Pivot Tables, VLOOKUP, Macros, Templates)

Software & Tools: Sage, Java, Microsoft Office Suite

WORK EXPERIENCE

Deduction Analyst | [The Emerson Group](#)

04/2026 – Present

- Processed and reconciled approximately 300 deduction line items daily using Excel, Sigma, and Sage, maintaining high accuracy across all financial records.
- Managed dispute review, data reconciliation, and vendor communication concurrently — handling the full deduction lifecycle across roles typically divided among separate team members.
- Co-developed an Excel automation template that reduced manual processing time by 50%, improving team throughput and minimizing data entry errors.
- Built a dynamic inventory adjustment code generator tool to streamline brand classification and deduction categorization across large datasets.
- Reviewed, disputed, and resolved deductions through structured communication with clients and vendors, ensuring timely resolution and accurate financial reporting.

Teller | [CXI \(Currency Exchange International\)](#)

07/2023 – 06/2025

- Executed daily currency transactions averaging \$10,000, maintaining 100% accuracy and strict compliance with all federal and institutional regulations.
- Analyzed inventory data for 20+ currencies, optimizing stock levels to match transaction volume and reducing shortages by 15%.
- Performed precise daily currency audits, consistently maintaining accurate records and minimizing discrepancies across all financial holdings.
- Resolved 50+ customer inquiries weekly on exchange rates and transaction details, contributing to a 20% improvement in customer satisfaction scores.

PROJECTS

Loan Approval Analysis (Python, Pandas, Matplotlib, Seaborn, Jupyter)

07/2025

<https://github.com/JesseDrum/Loan-Approval-Analysis>

- Conducted Exploratory Data Analysis (EDA) on 614 loan applications to identify key drivers of approval decisions and uncover opportunities for business growth.
- Identified Credit History as the strongest predictor of loan approval; applicants with positive history were approved ~80% of the time vs. 92% rejection rate for those without.
- Recommended targeted marketing campaigns for Semiurban areas (77% approval rate) and proposed streamlining the application process for high-credit-score applicants.

Data Analytics Portfolio Website (HTML, Python, Pandas, Matplotlib, Seaborn)

2025

<https://jessedrum.github.io/portfolio/>

- Designed and developed a professional portfolio website to showcase data analytics projects and business intelligence insights.
- Presented complex data findings in a clear, visual, and business-focused format to highlight storytelling and analytical skills.
